For: GMS, chief engineers and housekeeping/F&B managers at hotels and serviced properties in Clifton, DHA, and the Shahra-e-Faisal corridor. In hospitality, pest control is **reputation management** — one review can cost more than a year of service. Tick every item that is TRUE; each **unticked** box is a risk to your rating. ~5 minutes.

Bed bugs (the reputation killer)

- ☐ Rooms are on a **proactive inspection** cycle — not react-to-complaint only
- ☐ Mattresses, headboards, and skirting are checked for *Cimex* signs
- ☐ A defined heat / chemical treatment protocol exists for a positive room
- ☐ Housekeeping is trained to spot and report early signs

Kitchen & F&B

- ☐ Cockroach control is **gel baiting**, not broadcast spray, in kitchens
- ☐ Drain flies and fruit flies are managed at the source (drains, waste)
- ☐ Grease traps, bins and back-of-house are on a monitoring cadence
- ☐ No pesticide is applied on or near food-prep surfaces

Guest & public areas

- ☐ Lobbies, gardens and pool areas are covered for mosquitoes (Bti / source reduction)
- ☐ Rodent stations run back-of-house and perimeter, discreet from guests
- ☐ No standing water in planters, AC trays or drainage after rain

Discretion & documentation

- ☐ Service runs **after-hours / quiet hours** with no odor in guest areas
- ☐ Per-area service certificates are filed for brand-standard / franchise audits
- ☐ An emergency (same-day) call-out is available for a live bed-bug report

Your risk band

Count your **unticked** boxes:

Unticked	Band	What it means
0–3	● Solid	Well-protected. Keep the room-inspection log current.
4–7	● At risk	Gaps that surface in a guest review. Worth a review.
8+	● High risk	One incident from a reputation hit. Book a site review.

Want a discreet, brand-audit-ready programme? Free site review.
